ClovaGuard can be used as a primer or intermediate coat beneath ClovaCoat or as an intermediate coat beneath ArmourShield where superior performance is required. A high performance one coat system where low gloss is acceptable or where chalking in sunlight is not a concern. For use on storage tanks, oil and gas equipment and machinery, structural steel in pulp and paper mills, sewage treatment plants, marine and other heavy industrial areas.

ClovaGuard is a two component high build, high performance, polyamide coating recommended for severe exposures. It is an abrasion and chemical resistant coating with a low gloss appearance.

Features
- High performance
- Polyamide epoxy
- High build
- Low gloss
- Self priming
- Intermediate coat
- One coat system
- Chemical resistance
- Abrasion resistance
- MPI # 108 approved
- VOC compliant

Multiple Uses
- Storage tanks
- Oil and gas equipment
- Oil and gas machinery
- Structural steel
- Pulp and paper mills
- Sewage treatment plants
- Marine equipment
- Heavy industry equipment
