ClovaBond Universal Bonding Primer is a 100% Acrylic, solvent based, wash coating formulated to provide adhesion to galvanized steel, aluminum, stainless steel and other substrates. This is a thin film wash primer exhibiting excellent topcoat compatibility with architectural, industrial and maintenance type coatings. This product will replace Chromate containing vinyl wash primers for most non-corrosive applications. This Universal Bonding Primer is a single pack primer used for ducting, piping, galvanized steel, aluminum paneling, copper pipe, stainless steel or other non-ferrous metals. Also good for porcelain, glass, ceramic tile or fiberglass substrates.

**Features**
- Single component
- Thin film wash primer
- Excellent top coat Compatibility
- Excellent adhesion
- Available in aerosol cans for field use
- Universal bonding primer
- Shop use only

**Multiple Uses**
- Galvanized steel
- Aluminum
- Stainless steel
- Copper pipe
- Ducting
- Piping
- Porcelain
- Glass
- Ceramic tile
- Fiberglass substrates
