Polyurethane, two component high gloss coating that combines the appearance of a high quality enamel and the performance of a chemically cured coating. Polycoat II protects metal surfaces in marine environments, chemical plants and other corrosive areas. It has excellent gloss and color retention, abrasion resistance, impact resistance and chemical resistance. Can be used on structural steel beams, trusses, industrial equipment and all types of machinery.

**Features**
- Shop use only
- Complete color range
- Flash rust resistant
- Excellent gloss retentive
- Excellent color resistance
- Polyurethane
- Chemical resistance
- Marine
- MPI #78 approved
- Brush and rollable

**Multiple Uses**
- High traffic corridors
- Structural steel/beams
- Chemical equipment
- Oil and gas equipment
- Waste container
- All types of equipment
- All types of machinery
- Pumps
- Trailers
