Tough, resilient interior / exterior long lasting coating designed for maximum exterior durability with superior gloss and color retention. Designed for protection of non-submerged metal surfaces. It is ideally suited for protection of steel storage tanks, structural steel, railings, pumps, equipment, awnings and overhangs. This enamel does well with the thermal shock often experienced by coatings applied to exteriors of steel storage tanks, towers, and structural steel. Rodda Silicone Alkyd will remain resilient longer than conventional oil base enamel upon exterior exposure to sunlight.

**Features**
- Complete color range
- Excellent gloss retention
- Excellent color retention
- Color fast
- High gloss
- MPI 21 approved
- Long lasting
- Hard durable finish
- VOC compliant

**Multiple Uses**
- Steel storage tanks
- Structural steel
- Railings
- Pumps
- Equipment
- Awnings
- Overhangs
- Towers
- All types of machinery
- Trailers
